MUST LAY CARDS ON THE TABLE

Lord of British Admirality Says Frankness Is town Needed

Wants Great Britain and America to Confide in Each Other in Full

America's Policy

America's Policy

or the United States of menale is laying down the that America shall main- that America shall main- any at least equal to that of the her intention to respect to the third states of the thir eiple that America shall main- feasor at Stanford university a navy at least equal to that of the her intention to return any other power. That is a claim to east by way of the southern states quides on the matter equality which this country has never expected in the past—and never would expect save in connection with a great English-speak. ing nation that sprang from its loins and must ever hold a great place in our regard and confidence. We have twice affirmed in the most formal way possible our expedients for the way possible our expedients for the future of a one-power standard. If you look across the Atlantic You see that Mr. Denby, secretary of the American may, has said that Amer-fean interests naturally call for a navy equal to that of any other

"The difference between our formula and that of America is too say we should not discuss this ques-tion, because war with any of our late allies and with America is un-thinkable. Wars do not become im-possible because people never think about them, and this is a subject about which we ought to be thinking —thinking day and night—with the fixed intention of making it impos-sible. Because if ever a war is going to take place between us and any of our late allies it will be the fault of blind or criminal leading for which our statesmen, whether London, Washington, Tokio or the capital of an vother naval power in history if they fail to avert such

"Mr. Denby had said that the "Mr. Denby had said that the greatest calamity that could overtake humanity would be war between this country and America, and that between us we could coatrol the sea. I have no doubt," he said, "that between us we could, but the question before us today is whether we are heading in the right direction with regard to our mixted. whether we are heading in the right direction with respect to our navies will controlled to our navies will controlled to our navies will controlled the government of this country has a clear record. We have in our estimates of this year set an example of reduction. We have admittedly taken risks as regards the relative position of our havies and of others and we have prepared to go as far as possible in that direction by mainst agreement. But merely to talk of hands across the sea' is not sufficient, we must have our heads across the sea as well. It is not enough to talk as well. It is not enough to talk about blood boing thicker than water. What we want is that plain sems which is characteristic of both our countries and personally from a long knowledge of America I have a profound belief in business talk leading up to a square deal.

Harding's Policy.

"I hold stronge that in this mat-ter we are not engaged in a game of poker or of bluff, but in a sort of game where we count to lay our cards on the table and discuss frankby with our friends what the future In the affairs of this world

Coeds Form Soviet.

Coeds Form Seviet.

LONDON, April 30.—Amone the natonishing modley of new theories being attempted at English schools is a nort of setting up of a soviet in the cless. In the readvantional school the boys and girls are instructed to decide for themselves just now they shall be marked by their marter and how and what they shall study. More than this, they are at theirly to criticize their marter. The argament is that aff children are tikely to obey rules of their own making it is said the girls take more kindly than boys to the new idea.

SHARWAR SALESTAN SALE

The Riding Comfort of the Nash Six Equaled Only By Higher Priced Cars

One quality that impresses you with the fact that the Nash Six is the greatest value in its price field is its exceptional riding comfort. Low hung and nicely balanced upon its staunch chassis, this roomy car has unusually long springs, and its broad, restful, deeply cushioned seats are thickly upholstered.

Compare this quality of the Nash Six with that of other cars costing from \$100 to \$600 more and you will have one reason why, from the time it was first introduced, this comfortable automobile has been a sales leader.

1171/2-inch Wheelbase

THE TULSA FOUR is built to stand the wear and tear incident to travel on rough roads and over the Southwestern Oil Fields: Every part that goes into its construction is used because it has successfully passed the scientific tests that entitle the Tulsa Four to be heralded far and wide as "The Car That Conquered the World's Worst Roads."

We sell the Tulsa Four on our own guarantee which means that our skilled mechanics have gone over each car to carefully inspect each moving part-each bolt-each stay, and they have pronounced the Tulsa Four ready for your hand on the wheel, and in every respect all the manufacturers claim for it.

Read the specifications of the Tulsa Four. Note the wheelbase that is found only in higher priced cars. Observe the list of recognized parts-the best that money can buy. Then you can understand at a glance why we put the well known Fred Shaw guarantee on the Tulsa Four.

Come to our salesroom and look over this sturdy car-drive it out over the smooth streets and then take it onto the country roads. Driving the Tulsa Four will sell it-and the price is right.
